

In the claims:

1. **(currently amended)** A method of protecting organic material from light, wherein the organic material is a nutritional substance, foodstuff or pharmaceutical, which method comprises applying to or incorporating in a carrier material a combination of the dye of formula

the dye of formula

and a UV absorber,

and, optionally, further dyes,

and positioning the so-treated carrier material between the light source and the organic material to be protected.

2. **(previously presented)** A method according to claim 1 which comprises applying to or incorporating in a carrier material, in addition to the dyes of formulae (1) and (2), a dye of formula

(3).

3. **(previously presented)** A method according to claim 1, which comprises using as UV absorber a UV absorber from the class of the 2-(2'-hydroxyphenyl)benzotriazoles, the class of the 2-hydroxy-benzophenones, the class of the esters of substituted or unsubstituted benzoic acid, the class of the acrylates, the class of the oxamides, the class of the 2-(2-hydroxyphenyl)-1,3,5-triazines, the class of the monobenzoates of resorcinol, the class of the formamidines, or a polyester UV absorber of formula

(4)

having a specific weight of from 1200 to 1400 at 25°C.

4. **(previously presented)** A method according to claim 1, which comprises using as UV absorber a UV absorber of formula

(8),

(9),

(10)

or

(11).

5-8. (cancelled)

9. (previously presented) A method according to claim 1, wherein the organic material is a nutritional substance or foodstuff.

10. **(previously presented)** A method according to claim 1, wherein the organic material is a pharmaceutical.

11. **(previously presented)** A method according to claim 2, which comprises using as UV absorber a UV absorber from the class of the 2-(2'-hydroxyphenyl)benzotriazoles, the class of the 2-hydroxybenzophenones, the class of the esters of substituted or unsubstituted benzoic acid, the class of the acrylates, the class of the oxamides, the class of the 2-(2-hydroxyphenyl)-1,3,5-triazines, the class of the monobenzoates of resorcinol, the class of the formamidines, or a polyester UV absorber of formula

having a specific weight of from 1200 to 1400 at 25°C.

12. **(previously presented)** A method according to claim 2, which comprises using as UV absorber a UV absorber of formula

(9),

(10)

or

(11).

13-18. (cancelled)
